

## SUICIDE PREVENTION RESOURCES

*You are not alone. Every day, people struggle with thoughts of suicide – often in silence, feeling isolated, overwhelmed, or hopeless. It's more common than many realize, and it touches individuals, families and entire communities. There is hope. With understanding and compassion, the right support and healing is possible. Whether you are worried about yourself or someone you care about, help is within reach.*

**This guide shares warning signs, risk factors, and ways to find help.**

**Call/Text 911** if someone is in immediate danger, if the situation is life-threatening, or if it could become violent. That could include talking about suicide while having a plan and taking steps to act, especially if they have a history of attempts or a recent discharge from a hospital.

**Call/Text/Chat 988** for a non-emergency mental health crisis, including when someone has suicidal thoughts but no plan or history of attempts. Stay with them until they are connected to a mental health professional.

## 24/7 SUICIDE AND CRISIS HOTLINES

### 988 Suicide & Crisis Lifeline

## COMMON WARNING SIGNS OF SUICIDE

*Learning to recognize the warning signs of suicide helps us spot when someone is struggling—so we can step in with support when it's needed most.*

### Top Warning Signs of Suicide:

- Talk or Thoughts: Expressing thoughts about wanting to die or specific plans for suicide.
- Behavior Changes: Saying goodbye, withdrawing from activities, changes in sleep or eating patterns, or acting recklessly.
- Emotional State: Feeling hopeless, extremely anxious, or persistently sad, and feeling like a burden.

## RISK & PROTECTIVE FACTORS

*Suicide is rarely the result of a single event. Many things can help protect against it—and everyone has a role to play in prevention.*

Risk factors are challenges in life that may increase someone's vulnerability, whether personal, within relationships, or in the community.

### Risk Factors for Suicide:

- Previous suicide attempt
- Feelings of hopelessness
- Social isolation

Protective factors are supports and connections that help keep people safe and reduce the chance of suicidal behavior.

### Protective Factors for Suicide Prevention:

- Effective coping skills
- Connections and support from peers also living with mental health conditions
- Connections and support from family and friends
- Engagement in consistent and high quality physical and behavioral healthcare

## ADDITIONAL RESOURCES

*These resources provide important information, support, and tools to help recognize, deal with, and manage mental health challenges, preventing suicide and improve emotional well-being.*
